

# SPACE CAMP

It is a big year for Space Exploration! NASA just celebrated it's 60th birthday and 50 years ago, a man stepped on the moon. Pretty awesome!

At Space Camp, kids will assume the roles of rocket designer, mission control, and astronaut. It'll be a blast! With this intergalactic camp, you will watch the kids make space exploration their own.

We are going to bring this interactive, exciting, weeklong camp to Chester June 10th-14th! Activities for this camp include:

- Make your own telescope
- Make your own star finder
- Design, build, and fly a rocket
- AND MUCH MORE!
